DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Robert A. Walsh on February 03, 2004.

The application has been amended as follows:

In claim 1, line 5, add "having an FET" after a second gain device.

Allowable Subject Matter

2. Claims 1-17 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Chen et al. (US 5,656,534) appears to be the closest prior art reference. Chen et al. teaches a programmable element, comprising :

A first device on a substrate having a first electrode and a first insulator disposed between the substrate and said first electrode, said first insulator having a first value of a given parameter; a second device on a substrate having a second electrode and a second insulator disposed between the substrate and said second electrode, said second insulator having a second value of said given parameter that is different from

Application/Control Number: 10/064,375

Art Unit: 2811

said first value; wherein said first and second electrodes of said first and second device are coupled to one another on a continuous layer.

However, this reference fails to teach that the second gain device comprising a FET or

the first electrode having a plurality of separate conductive lines overlaying the diffusion region, or

the first device comprising a diffused electrode that is coupled to said source of programming energy.

Prior art of record fails to teach or suggest to incorporate these limitations into Chen et al. to arrive at the claimed device.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donghee Kang whose telephone number is 571-272-1656. The examiner can normally be reached on Maxiflex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eddie C Lee can be reached on 703-308-1690. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
